

INCREASED STABILITY & ENHANCED RIDE PERFORMANCE

INNOVATIVE AIR RIDE DESIGN PROVIDES THE GREATEST "BEST-IN-CLASS" FEATURES

- Easily Adjust For 33.5" - 34.5" Frame Widths/2 Models For 9" - 14" Ride Height
- Unique Angled Air Spring Design Distributes Forces Directly To Frame For Superior Stability And Wheel Support
- Custom Rolling Lobe Air Spring Design For Superior Ride Performance
- The Durable Fabricated Axle Provides Lower Weight And Enhanced Durability, While The Wide Beam Center Design Provides Increased Stability And High Ground Clearance
- Tuned Steering Damper System Minimizes Wheel Wobble For Increased Component Life And Provides Powerful Self-Centering When Lifting

OPTIMIZED TURNING ANGLE

MAXIMIZED GROUND CLEARANCE & STABILITY

BEST IN CLASS PACKAGE SIZE

- By Far The Smallest Package Size In The Industry
- Creates More Frame Rail Space For Tanks And Other components
- Design Provides Easier Installation And Service
- Minimizes Axle Spacing For Multi-Axle Configurations

BEST IN CLASS LIFT PERFORMANCE

- Super Chamber Lift Device
- High Lift Force Eliminates Bounce While Suspension Is Stowed
- Fastest Lift Time - Only 4 Seconds
- Fastest Lift Axle Available - 4 Second Lift Time
